HHSE Health and Safety Addendum

This document is an addendum to School District 78's document titled "Worksafe Plan and Info and COVID-19 Safety Plan Health and Safety Procedures and Guidelines" revised on May 21, 2020 which can be found on our school website at harrisonhotspringselementary.ca.

The health and safety procedures and guidelines differ at our school from the above-mentioned document in the following ways:

- When students enter the building at the start of the day, they head to their classroom to wash their hands instead of lining up to wash their hands in the washrooms in order to avoid congestion in the washrooms and hallway.
- All students exit the building at the end of the school day through different doors assigned to each classroom to reduce hallway congestion. Mr. Neufeld's and Mrs. Jack's classes also exit the building directly from their classroom for recess and lunch.
- Used gym equipment is cleaned periodically by staff during the day in addition to evening cleaning by the custodian.
